

IMO STATE WORLD BANK (SFTAS) PROPERTY ENUMERATION EXERCISE 2022

Presentation of Project Implementation Roadmap

To the Commissioner of Finance
(June 30, 2022)

Kamr

Outline of Presentation

1. Introduction
2. Overview of Implementation Roadmap
3. The Project Budget Assumptions
4. The Project Budget Line Items
5. Project Timelines
6. Project Implementation Team
7. Names of the Enumerators
8. Introduction
9. Project Area of Interest
10. Project Duration
11. The Technology
12. Workforce/Survey 123 (Form/Maps)
13. The Dashboard(s)
14. Quality Control (1st Level)
15. The Owerri Jurisdiction
 - i. Data Captured within the Jurisdiction
 - ii. Map
 - iii. Coverage
 - iv. The Hostility Index Map
 - v. The Hostile Areas
16. Gallery of the Stakeholder Identification & Engagement Process
17. The Stakeholder Engagement Attendance
18. The Media Approach Adopted
19. The Enumeration Exercise Training
20. Demand Notice and Evidence of Payment for a Selected Customer

For Spatial Layers Ltd

Overview of Implementation Roadmap

Project Definition:

“to collect information on property characteristics for 50% of all urban properties with electricity connections, to meet requirements for DLI 5 in Imo State”

A total of 160,000 properties were captured during the Field exercise that commenced in April, 2022.

This project involves the implementation of state-of-the-art technologies, including Geographic Information Systems (GIS) and mobile applications to achieve the following objectives in respect of all the properties within 6 Local Government Areas (LGAs) in Imo State:

i) Property enumeration;

ii) **Data capture;**

iii) Update the Land Registry Legacy Data

These Six (6) LGAs and they were Zoned into One (1) Region;

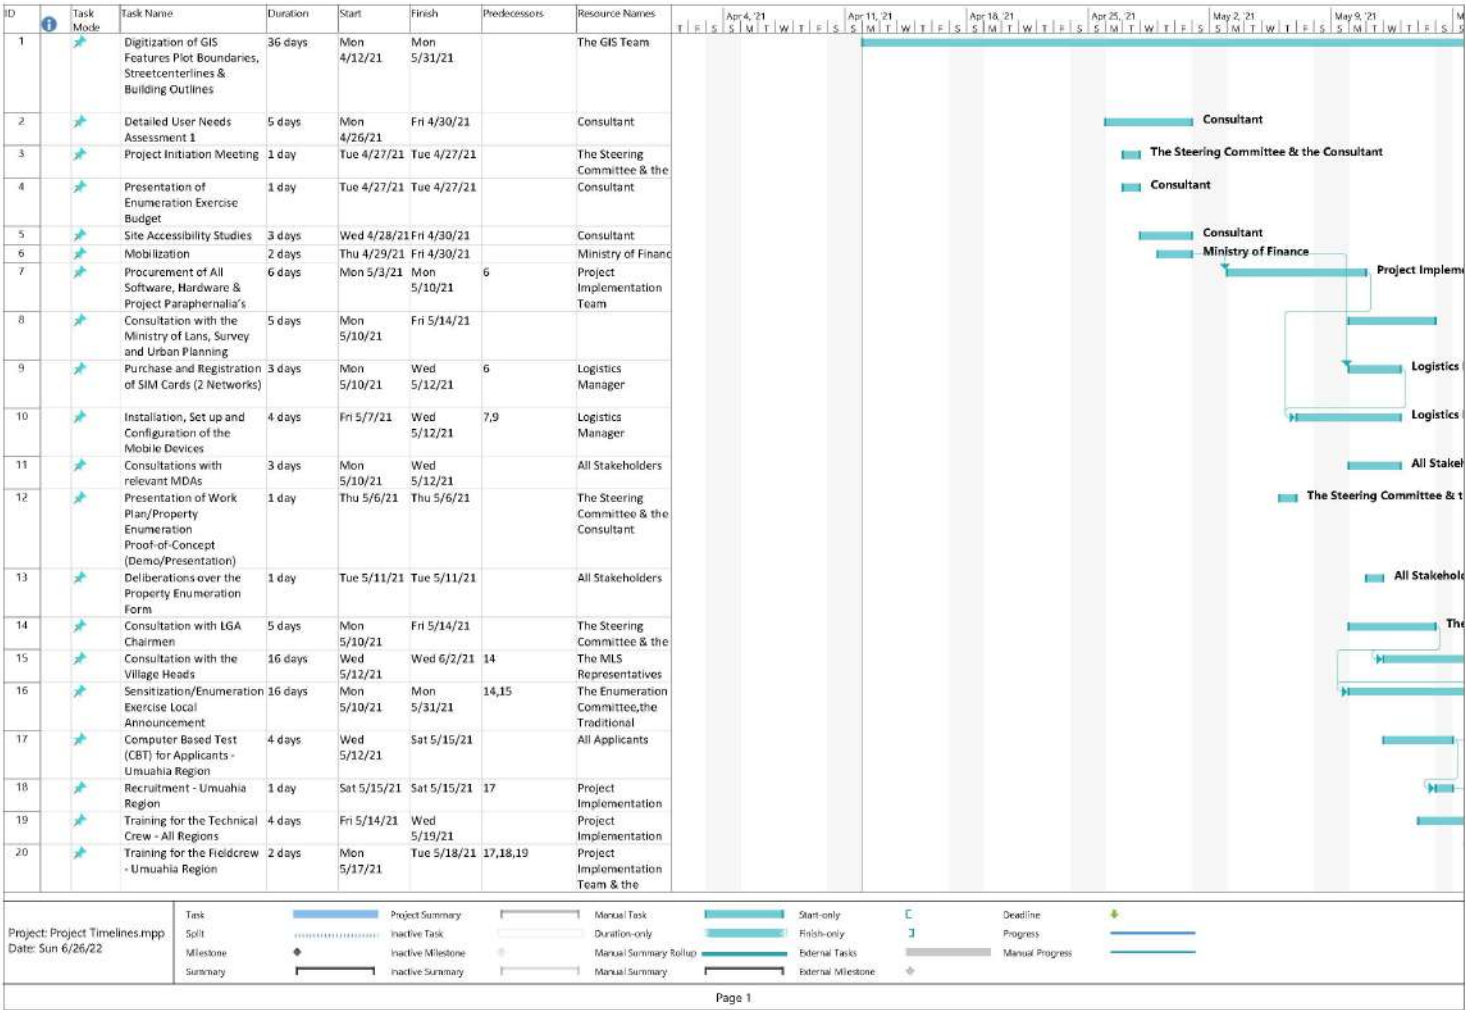

1. Owerri Municipal – Owerri Region
2. Owerri North – Owerri Region
3. Owerri West – Owerri Region
4. Ngor Kpala – Owerri Region
5. Mbaitoli – Owerri Region
6. Ikeduru – Owerri Region
7. Oguta – Owerri Region

The Project Budget Assumptions

PROJECT ASSUMPTIONS					
#	Details	Number	Remarks	No	Comments
1	Enumerators and supervisors				
2	Number of LGA	12	lganumber		
3	Number of wards		wardnumber		
4	Target properties	250000	targetnumber		
5	Number of occupants (1.1 of number of buildings)				
6	Enumerator productivity (occupants/day)				
7	Number of working days in project	75			minus Monday sit-at-homes, Saturdays inclusive
8	Required number of enumerators	200			
9	Number of enumerator Teams per supervisor	10			
10	Required number of Field Coordinators	12			
11	Required number of Field Supervisors (LSK)	20		232	enumstaff
12	Quality control and checks, training				
13	Number of supervisors per quality control/lead supervisors				
14	Required number of quality control/lead supervisors				
15	GIS Coordinator	1			
16	GIS Analysts	20			
17	Statistician	0			
18	Valuers	12		42	spnstaff
19	Project coordination				
20	Project coordinator				
21	Assistant project coordinator				
22	Public outreach				
23	Required public outreach staff	8			
24	Required public outreach supervisor	1			
25	Tablets	252			
26	Field staff (enumerators, supervisors, quality control, GIS specialists, Valuers)	274

Introduction (Fieldwork)

The entire Project Area would be gridded into grids covering 1000m by 1000m, these grids would form the Jurisdiction Enumeration Areas (JEA). Based on the above, it is envisaged that the GIS-based Property Enumeration and Data Capture component, coupled with the mobile applications to be deployed for this purpose, will enable the project to acquire the property dimension and location-related parameters (annual charge rate, building area and property rate code); while the professional input of the project's Valuers (Estate Surveyors), also coupled with the software applications also to be deployed for this purpose, will enable the computation of the property valuation-related parameters (land value and building value). The Property Tax Zone feature of the GIS will also assist in the differentiation of valuation estimates based on neighborhood, zone or district characteristics respectively.

A handwritten signature in black ink, appearing to read 'Kam' followed by a stylized flourish.

Karl

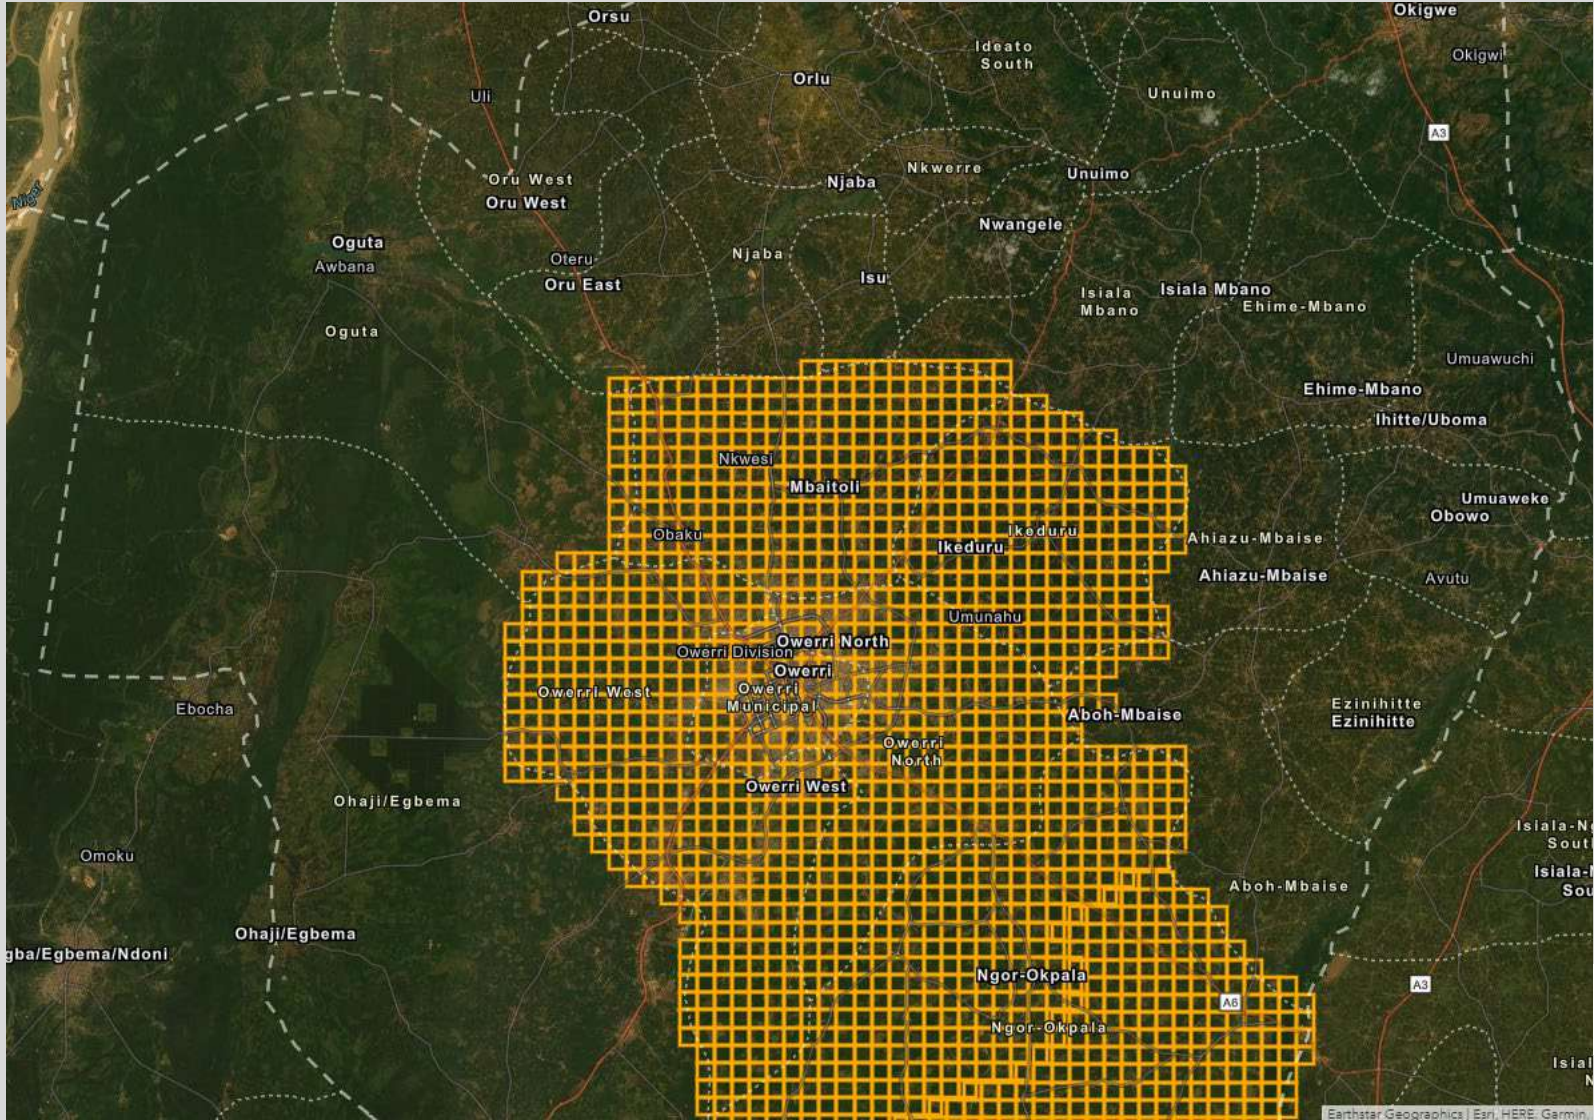

The Project Area of Interest

The following are Project Phase 1 Areas of Interest;

1. Owerri Municipal – Owerri Region
2. Owerri North – Owerri Region
3. Owerri West – Owerri Region
4. Ngor Kpala – Owerri Region
5. Mbaitoli – Owerri Region
6. Ikeduru – Owerri Region
7. Oguta – Owerri Region

A handwritten signature in black ink, appearing to read 'Kamr', is displayed within a white rectangular box.

The Project Area of Interest Contd

Kam2

The Project Duration

The Project duration would be for a period of six (4) Months;

A (1) Month for Project preparation activities, that includes

- i. Procurement
- ii. Project Office Set up
- iii. Recruitment
- iv. Systems Set up/Installation

Three (3) Months for the Enumeration Exercise (Fieldwork proper) - the plan was to run the enumeration exercise within the Two (3) Months for Data Processing and Analysis and Final Submission preparation.

The Technology

The ArcGIS Online Technology was deployed for this Project, leveraging on the AGOL license owned by Imo State, given by the World Bank.

What is ArcGIS Online

ArcGIS Online is a cloud-based mapping and analysis solution. Use it to make maps, analyze data, and to share and collaborate. Get access to workflow-specific apps, maps and data from around the globe, and tools for being mobile in the field. Your data and maps are stored in a secure and private infrastructure and can be configured to meet your mapping and IT requirements.

The AGOL Apps

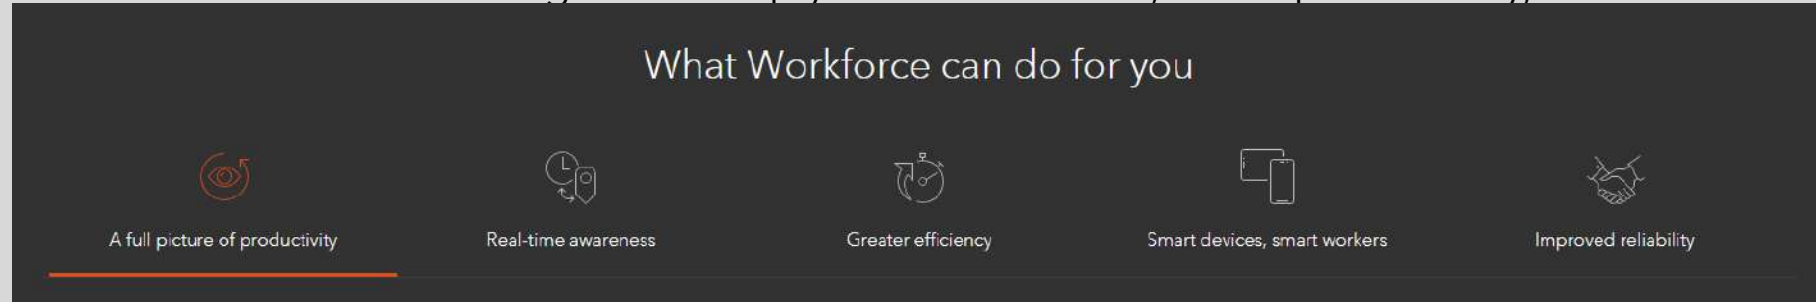

The following apps were paired for the purpose of the Property Enumeration Exercise;

- i. Workforce - the Map (Grids)
- ii. Survey 123 - the Form/Map

Workforce

ArcGIS Workforce is a mobile app solution that uses the power of location to coordinate your field workforce. It integrates work management to reduce reliance on paper and provides everyone with access to the authoritative data they need. ArcGIS Workforce is designed to help you reduce errors, boost productivity, and save money.

A full picture of productivity

- A common view from the field and the back office makes the right things happen. The right worker goes to the right place with the right tools to do the right job. And, because everyone is working from the same right data, you avoid costly errors and inefficiencies.

Real-time awareness

- Gain insight from the office into field activities so you are always aware of the status of fieldwork. When priorities change due to unanticipated events, you are ready to respond. You have a clear view of task priorities and field crew locations to get things quickly back on track.

Greater efficiency

- When you streamline the process of managing and assigning field work, it saves time for everyone. Fieldwork projects are created and distributed into discrete assignments. Then, fieldworkers receive and report on assignments through smart devices.

Smart devices, smart workers

- Fieldworkers carry their maps and assignments on smartphones or tablets, making it easy and convenient for them to stay organized, report progress, call for assistance, and stay productive. Say 'goodbye' to those paper-based processes that caused too many errors and inefficiencies.

Improved reliability

- Surpass expectations and build trust with your customers through improved reliability and consistency in the completion of fieldwork. Effective project management, with real-time insight into field activities, gives you the power to meet service commitments.

Kam

Survey 123

ArcGIS Survey123 is a complete, form-centric solution for creating, sharing and analyzing surveys. Use it to create smart forms with skip logic, defaults, and support for multiple languages. Collect data via web or mobile devices, even when disconnected from the Internet. Analyze results quickly, and upload data securely for further analysis.

Anytime, anywhere

Capture data anytime, anywhere with the ArcGIS Survey123 app. It works on smart devices, laptops, or desktops as a native app and also in the browser. Stay productive even in disconnected environments.

Smart surveys

Design surveys that enable rapid collection with predefined questions that use logic and provide easy-to-fill answers, embedded audio and images, and offer many languages. ArcGIS Survey123 supports the XLSForm specification.

Built on ArcGIS

Data captured in ArcGIS Survey123 is immediately available in the ArcGIS platform. Optimize your field operations, understand your data, and communicate your work.

Flexible for varied scenarios

When a project must start quickly, create a survey rapidly to start collecting data. When managing multiple teams in different locations, standardized forms keep everyone working in unison.

The Dashboard(s)

ArcGIS Dashboards enables users to convey information by presenting location-based analytics using intuitive and interactive data visualizations on a single screen. Every organization using the ArcGIS platform can take advantage of ArcGIS Dashboards to help make decisions, visualize trends, monitor status in real time, and inform their communities. Tailor dashboards to your audiences, giving them the ability to slice the data to get the answers they need. Dashboards are essential information products, like maps and apps, providing a critical component to your geospatial infrastructure.

The Owerri Region

The Property Enumeration Exercise commenced on the 9th April, 2022 with a Pilot Data Capture Exercise, the Data capture commenced on the 12th April, 2022. We have been able to capture a total of ~**166755** Parcels (171992 Buildings & 176805 Building Units, ***Kindly note that this number will reduce as we discovered that some enumerators were involved in sharp practice***) as at the close of work today (22nd June, 2022). The entire state was divided into 4 Regions to be covered during the Phase 1 of the Project, these regions are

1.

Owerri Region – Owerri Municipal, Owerri West, Owerri North, Ngor Kpala and Mbaitoli LGAs respectively.

2. Obowo Region – Obowo LGA
3. Okigwe Region – Okigwe and Ideato North LGAs
4. Orlu Region – Oru East, Oru West, Orsu, Orlu

We started the Enumeration Exercise in the Owerri Municipal LGA, we have finished the Exercise in this LGA (except for some hostile areas), now we are currently working in Owerri West, Owerri North, Ngor Kpala and Mbaitoli LGAs. We are currently working with 100 Field Teams (200 Jurisdiction Enumerators note: some Teams have just 1 enumerator) and 15 Monitors here in Owerri Region. Plans to move to the next Jurisdiction is now under-way. The highest daily output for still **@5,519 Parcels** (5,596 Buildings & 5,662 Building Units).

Bill Penalties or Pay Online Now

Section 32(1) of the Imo State Land Use Charge Law states that, Where a person who has received a Land Use Charge Demand Notice fails to pay the amount before March 30th or due date specified in the notice, the charge payable shall be increased by the following percentage
(a) between April 1 to May 31 - 15%;
(b) between June 1 to August 31 - 25%; and
(c) After August 31st - 50%.
Section 32(2) says, However, if payment is not made by October 1st, the property on which the Land Use Charge is payable shall be liable to enforcement under the provisions of this Law by the State or its appointed agent until all the nonstanding taxes, penalties and administrative charges are paid.
